What is **BIXOS**?

Bixos, a cutting-edge blockchain development company established in **13.03.2020**. Since our founding, we have been dedicated to revolutionizing the way we interact with the digital world. We specialize in delivering innovative solutions across a range of blockchain technologies, including **NFT-Stake, GameFi, Crypto Payment Gateway, Advanced DAO**, and **Real Estate NFT Conversion**.

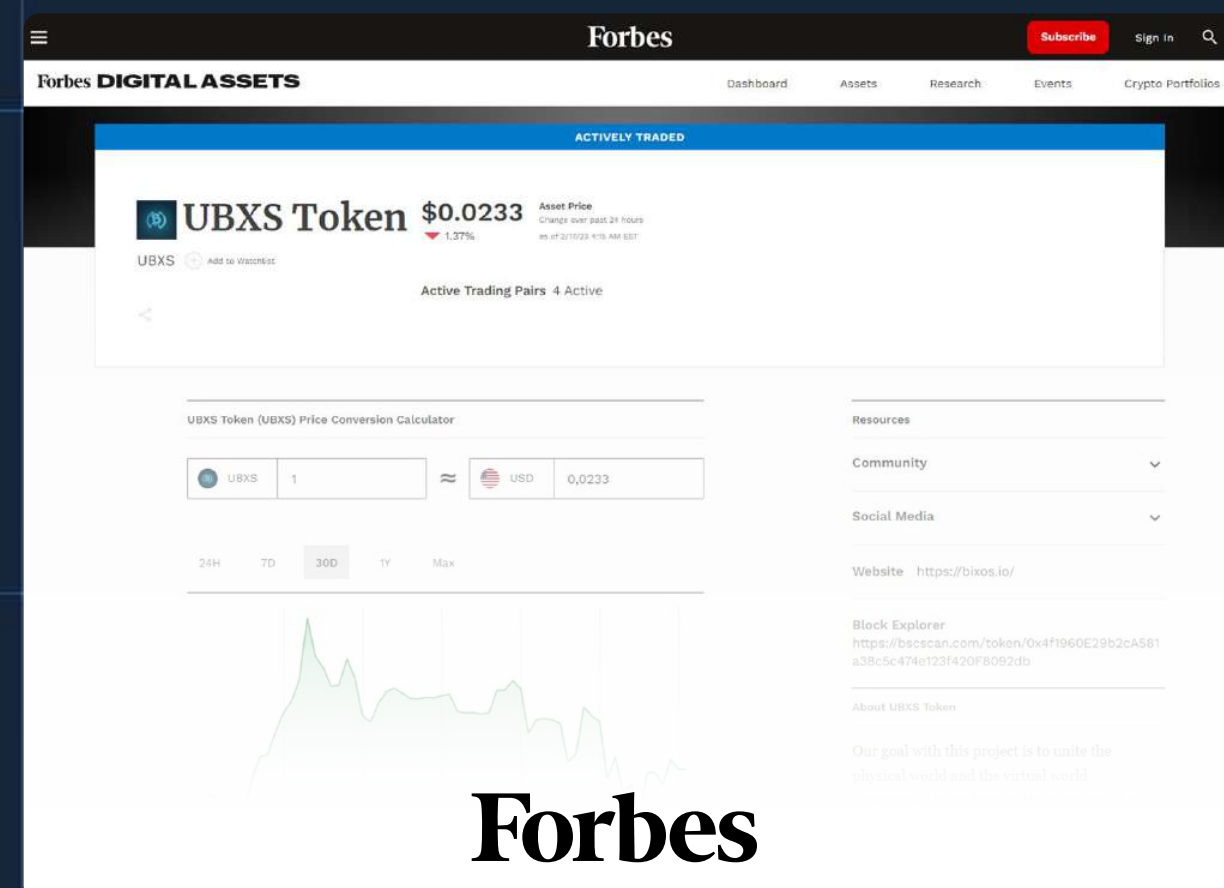

Our mission is to empower businesses and individuals to take full advantage of the limitless potential of blockchain technology, and to make it accessible and usable for everyone. Our team of experts has extensive experience in delivering cutting-edge projects that push the boundaries of what's possible, and we're proud to be at the forefront of this rapidly-evolving industry.

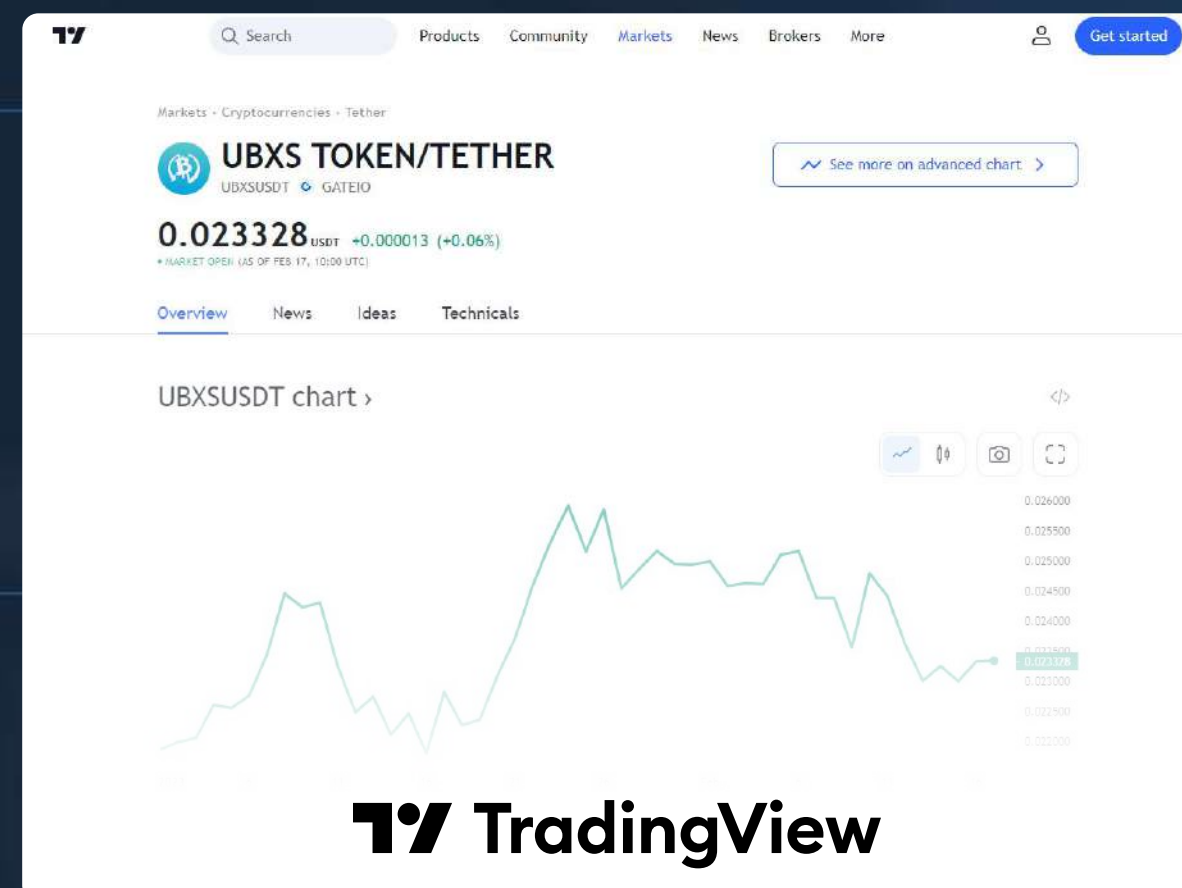

b.

Our Reputation

Having a good reputation in the crypto market is essential for any blockchain company, and **Bixos** is no exception. With numerous positive articles, **Bixos** has established itself as a reliable and trustworthy player in the crypto space. Additionally, the **UBXS** token's price chart is displayed on many major websites, such as **Forbes** and **Tradingview**. Overall, **Bixos** reputation in the crypto market has been a key factor in its success and will continue to drive its future endeavors.

Bloomberg

Bixos Announces the Successful Launch of the UBXS Token

Istanbul, Turkey--(Newsfile Corp. - March 7, 2022) - Bixos, a company that heavily invests in staking, DeFi farming, and DeFi liquidations by using its technologies, announced its successful launch of the UBXS project. UBXS token is a unique project that turns the real estate industry into NFT and combines the physical and virtual worlds.

The newly announced token has been developed on the Binance smart chain network as a creative approach to creating unlimited explorations by NFT users without swerving from one blockchain to another.

THE *AMERICAN* REPORTER

Bixos makes Blockchain accessible and profitable.

Mikail Emre Caliskan, CEO and Founder of Bixos: The most fundamental factor in developing Bixos is that people have access to blockchain-based technologies in an easier and more understandable way. Unfortunately, it has become very difficult to keep up with this ever-changing and developing technology.

When blockchain is mentioned, most of the time, a money market comes to mind. Actually, Blockchain is not a stock market, it is a new technology that establishes trust on the internet. It is the name of the new technology in which communities build trust instead of relying on central authorities.

GULF TIMES

Bixos Keeps Growing

Bixos has rapidly entered the cryptocurrency market, working on blockchain technologies. The company has Founded in the United States of America, Delaware. Many investors worldwide joined Bixos and claimed that they were happy with the return on their investment. In addition, the well-known work Bixos has done in Europe allowed it to expand and let investors in the Arabian peninsula take the opportunity.

The well-known businessman Faisal Al Meshari, who continues his activities in Saudi Arabia, has signed a massive deal with Bixos Inc.

Khaleej Times

Bixos is a TRON network super representative now!

Mikail Emre Caliskan, the founder of Bixos said: "We are proud to open our public node in the TRON network, where approximately 2.5 billion transactions are processed daily."

Caliskan further added, "By clearing the perception of blockchain equals money, Bixos will have a say in blockchain technology fields. In addition to these technologies, we will frequently announce our name in the world as a pioneer in many innovations. We believe that we will be one of the biggest voices in the digital network of the 2030s, and we are working with all our energy and faith in this context."

BITCOIN PRECIO

Bixos was created to supply the investors a simple and worthwhile manner

Mikail Emre Caliskan, CEO y fundador de Bixos: El factor más fundamental en el desarrollo de Bixos es que las personas tienen acceso a tecnologías basadas en blockchain de una manera más fácil y comprensible. Desafortunadamente, se ha vuelto muy difícil mantenerse al día con esta tecnología en constante cambio y evolución.

Cuando la gente habla de blockchain, suele pensar en un mercado monetario. En realidad, blockchain no es un intercambio, sino una nueva tecnología que genera confianza en Internet...

2. PROJECTS

a. GameFi

Our cutting-edge technology combines the excitement of multiplayer gaming with the limitless potential of the **metaverse** and **web3** technologies. With **GameFi**, players can immerse themselves in a fully-realized, interconnected world where the possibilities are endless. Whether you're competing against other players in real-time, exploring vast virtual landscapes, or unlocking new and exciting game elements, **GameFi** offers a unique and unforgettable gaming experience unlike any other. Our innovative platform uses blockchain technology to ensure the security and fairness of in-game transactions, and to give players full ownership and control of their virtual assets.

For more info visit :

game.bixos.io

2. PROJECTS

b. NFT Stake

NFT-Stake is a cutting-edge blockchain solution brought to you by Bixos. Our platform allows users to stake their virtual assets, much like a bond, for a specified period of time. In return, they receive interest on their investment, providing a secure and profitable way to grow their virtual wealth. With **NFT-Stake**, users have the flexibility to choose the length of their investment, from short-term to long-term, and the option to sell their **NFT-Stake** to other users at any time.

Our platform utilizes blockchain technology to ensure the security and transparency of all transactions, and to provide full ownership and control to our users. **NFT-Stake** offers a unique investment opportunity for those looking to take advantage of the fast-growing virtual economy, and to expand their virtual portfolios in a safe and profitable way. Whether you're an experienced investor or a newcomer to the world of blockchain, **NFT-Stake** is the ideal choice for anyone looking to take their virtual wealth to the next level.

For more info visit :

nftstake.bixos.io

2. PROJECTS

b. NFT Stake

i. The Problem

One of the major challenges with traditional staking methods is the lack of flexibility and control for users. When assets are staked, they are typically locked for a specified period of time, during which the user cannot access or use them. This inflexibility can be a significant drawback for many investors, as it ties up their assets for an extended period and limits their ability to respond to market conditions or changing investment opportunities.

ii. Our Solution

At **Bixos**, we recognized this problem and set out to create a solution that would give users more control over their staked assets. With **NFT-Stake**, our innovative platform, users can stake their virtual assets for a period of time that works best for them, and they have the option to sell their **NFT-Stake** to other users at any time. This flexibility and control gives users peace of mind, knowing that their assets are always available when they need them, and that they can make the most of any investment opportunity that comes their way.

2. PROJECTS

b. NFT Stake

iii. How Worked For Us

As income source:

Total assets locked for 1 year : **1,250,000 UBXS**

Average Sales price for UBXS : **\$ 0.12**

Locked Assets Value : **\$ 150,000**

As social reputation:

Our platform offers the following benefits in terms of reputation:

1. Pioneering Innovation:

By creating **NFT-Stake**, **Bixos** has established itself as a leader in the blockchain industry and a pioneer of new and innovative solutions.

2. Trusted Reputation:

Our platform has earned a reputation for security, transparency, and fairness, making it a trusted choice for investors and users alike.

3. Strong Community:

NFT-Stake has a thriving and engaged community of users and investors who believe in the platform and its potential.

2. PROJECTS

c. Real Estate NFT Conversion

Bixos is proud to present our **NFT Real Estate Conversion** project, which harnesses the power of blockchain technology to revolutionize the real estate industry. Our platform enables the conversion of traditional real estate assets into unique and valuable **NFTs** (Non-Fungible Tokens).

With **NFT Real Estate Conversion**, property owners can easily and securely tokenize their assets, unlocking a world of new possibilities. The **NFTs** can be bought, sold, and traded on the blockchain just like any other virtual asset, providing property owners with greater flexibility and liquidity.

At the same time, investors and collectors can benefit from the ownership and security provided by **NFTs**, giving them new opportunities to invest in real estate assets. The **NFTs** also provide a new level of transparency and traceability, enabling stakeholders to track the ownership and value of the assets in real-time.

1/2

2. PROJECTS

c. Real Estate NFT Conversion

Bixos's NFT Real Estate Conversion project is an exciting new way to invest in real estate, and is poised to shape the future of the industry for years to come.

Today, blockchain technologies have become more stable and applicable to the physical world. After the introduction of **NFTs**, blockchain technologies are able to connect with the physical world. As another major development, thanks to the **DAO** (Decentralized Autonomous Organization), the doors of decentralized corporations on the blockchain have now been opened without the need for the approval of a central authority. **DAOs** are legal and active in **USA** and proprietaries are not spending time with taxes or legal processes with their services. Taking these developments into account, **Bixos** Incorporation started working on a project that will shape the future.

2/2

2. PROJECTS

c. Real Estate NFT Conversion

i. The Problem

Purchasing real estate in a foreign country can be a complex and challenging process, often riddled with obstacles and difficulties. Some of the common problems faced by buyers include:

- ◆ **Language barriers:** Communicating with local agents, lawyers, and other stakeholders can be difficult if there is a language barrier.
- ◆ **Cultural differences:** Navigating unfamiliar cultural norms and expectations can be a major challenge, particularly when dealing with local laws and regulations.
- ◆ **Legal hurdles:** Understanding and complying with the local legal system can be a significant challenge, especially for foreign buyers who are unfamiliar with the local laws and regulations.
- ◆ **Financing issues:** Obtaining financing for foreign real estate purchases can be difficult, as banks may have strict requirements and unfamiliar lending practices.
- ◆ **Currency fluctuations:** Currency fluctuations can have a major impact on the cost of purchasing real estate in a foreign country, and can make it difficult to budget and plan effectively.
- ◆ **Property rights:** Protecting property rights and ensuring that the transfer of ownership is secure can be a major concern for foreign buyers, particularly in countries with less developed legal systems.

2. PROJECTS

c. Real Estate NFT Conversion

ii. Our Solution

Bixos is proud to offer a solution to the many challenges faced by buyers of foreign real estate. Our **NFT Real Estate Conversion** project enables the conversion of traditional real estate assets into unique and valuable **NFTs**, making it easy and secure to purchase and manage real estate assets from anywhere in the world.

With our solution, property owners can tokenize their assets, unlocking a world of new possibilities. The **NFTs** can be bought, sold, and traded on the blockchain just like any other virtual asset, providing property owners with greater flexibility and liquidity.

At the same time, the use of **NFTs** eliminates the need for local intermediaries and reduces the risk of fraud and mismanagement, making it easier and safer to invest in foreign real estate. The **NFTs** also provide a new level of transparency and traceability, enabling stakeholders to track the ownership and value of the assets in real-time.

In this way, **Bixos's NFT Real Estate Conversion** project provides a solution to the many challenges faced by buyers of foreign real estate, making it easy and secure to invest in real estate assets from anywhere in the world.

iii. Sub-sectors

The **NFT Real Estate Conversion** project by **Bixos** not only transforms the traditional real estate market, but it also opens up a world of new opportunities in several sub-sectors. By leveraging the power of blockchain technology, **Bixos**'s project has the potential to revolutionize the way we think about real estate and its related industries.

For example, the tokenization of real estate assets opens up new possibilities in the heritage sector. **NFTs** can be used to track the ownership and provenance of cultural heritage sites and artifacts, providing a new level of transparency and protection for these important assets.

In the insurance sector, **NFTs** can be used to more accurately assess and price risk. The ability to track the ownership and value of real estate assets in real-time can help insurers better understand their exposure and more accurately price their policies.

Similarly, the **NFT Real Estate Conversion** project has the potential to transform the way real estate is managed and maintained. By enabling stakeholders to track the ownership, maintenance, and value of real estate assets, **Bixos**'s project can help reduce the risk of fraud, mismanagement, and disputes, making it easier and safer to invest in real estate.

2. PROJECTS

d. **UBXS Token**

UBXS is the token of the **Bixos** ecosystem. Bixos has created UBXS as a means of facilitating transactions and interactions within its various projects, including the **Crypto Payment Gateway**, **NFT-Stake**, and **GameFi**.

By using **UBXS**, **Bixos** provides its users with a seamless and secure way to transact and interact within its ecosystem. **UBXS** tokens can be used to pay for services, participate in the **NFT-Stake** program, or play games on the **GameFi** platform, among other things.

One of the major benefits of **UBXS** is its security. As a token built on the blockchain, **UBXS** offers users a secure and transparent way to store and transfer value. Transactions made with **UBXS** are recorded on the blockchain, providing an immutable record of all interactions.

2. PROJECTS

d. UBXS Token

iii. UBXS Token Goal

The goal of the **UBXS Token** is to become a widely-traded, globally-recognized cryptocurrency. **Bixos** aims to achieve this by listing the **UBXS** token on the leading cryptocurrency exchanges, such as **Binance**, **Coinbase**, **Kraken**, and **KuCoin**.

By doing so, **Bixos** aims to increase the liquidity and exposure of the **UBXS** token, making it easier for users to buy, sell, and trade **UBXS**. This, in turn, will help drive adoption of the **Bixos** ecosystem, enabling users to participate in a range of exciting and innovative blockchain-based projects, such as the **Crypto Payment Gateway**, **NFT-Stake**, and **Real Estate NFT Conversion**.

2. PROJECTS

e. **Crypto Payment Gateway**

Bixos has created a cutting-edge **Crypto Payment Gateway** that is set to revolutionize the way merchants and consumers transact online. This payment gateway offers merchants a secure, fast, and cost-effective way to receive payments in cryptocurrency, without the need for intermediaries or the hassle of exchanging between cryptocurrencies and fiat currencies.

With its user-friendly interface and seamless integration with e-commerce platforms, the **Crypto Payment Gateway** makes it easier for merchants to accept payments from customers anywhere in the world, without the need for currency conversions or high transaction fees.

In addition to its cryptocurrency capabilities, the **Crypto Payment Gateway** is designed to evolve with the ever-changing payments landscape. In the future, it will be possible for merchants to accept payments not only in cryptocurrency, but also in traditional credit cards and other payment methods, making it an all-in-one solution for their payment needs.

1/2

2. PROJECTS

e. Crypto Payment Gateway

This project was a major undertaking, requiring a deep understanding of blockchain technologies and an unwavering commitment to delivering an innovative and reliable solution. However, **Bixos** was up to the challenge, leveraging its extensive expertise in blockchain development to create a payment gateway that sets a new standard for the industry.

The **Crypto Payment Gateway** is the perfect solution for merchants looking to stay ahead of the curve in the rapidly-evolving payments landscape. Whether you're a small business just starting out, or a large enterprise looking to streamline your payment processes, the **Crypto Payment Gateway** is the solution you've been searching for.

2/2

2. PROJECTS

Bixos Payment Panel

2. PROJECTS

e. Crypto Payment Gateway

i. The Problem

The problem with current payment gateways is that they often involve high fees, slow processing times, and a lack of security. Many businesses struggle to accept payments in cryptocurrency, and individuals face difficulties in making cross-border transactions.

2. PROJECTS

e. Crypto Payment Gateway

ii. Our Solution

Bixos has developed a cutting-edge crypto payment gateway that addresses these issues and provides a seamless payment experience. Our solution utilizes blockchain technology to offer low fees, fast processing times, and improved security for transactions. Our payment gateway can be integrated with traditional payment methods, such as credit cards, to offer a comprehensive solution for businesses and individuals. With **Bixos**, users can make transactions quickly, easily, and securely, anywhere in the world.

3. THE MARKET OPPORTUNITY

The market opportunity for a robust and secure crypto payment gateway is immense. As the adoption of cryptocurrencies continues to grow, there is a growing need for businesses and individuals to be able to easily and securely make transactions using these digital assets. With the ability to "pay by **@username**" on popular social media platforms such as **Twitter**, **Bixos** offers a unique and convenient payment solution for users. In addition, our platform will also include a donation model for platforms like **Twitch**, further expanding its market opportunity in the growing world of digital content creation and monetization.

3. THE MARKET OPPORTUNITY

Moreover, **Bixos**'s payment gateway will allow businesses to accept payments in a variety of cryptocurrencies, providing greater flexibility and accessibility for their customers. With our platform, businesses can tap into the growing market of cryptocurrency users and offer a cutting-edge payment solution to stay ahead of the competition. In short, **Bixos**'s crypto payment gateway presents a significant market opportunity for businesses and individuals looking to streamline their payment process while improving security and accessibility.

2/2

4. OUR BUSINESS MODEL

At **Bixos**, our business model is centered around the **UBXS** token and the fees charged for our crypto payment gateway. The **UBXS** token is a digital asset that is integral to the **Bixos** ecosystem and helps power our projects such as the **NFT-Stake** and **GameFi**. We earn revenue from the fees charged to merchants who use our crypto payment gateway, making it a key component of our business. The combination of these two revenue streams forms the basis of our business model and drives our continued growth and success.

5. MARKETING & SALES STRATEGY

Marketing and sales strategy for **Bixos** will primarily focus on creating awareness and building relationships with potential customers in the blockchain and gaming communities. This will be achieved through targeted digital marketing campaigns, such as email and social media marketing, and through hosting events and workshops to demonstrate the capabilities of our products.

In order to reach as many potential customers as possible, **Bixos** will also form partnerships with key players in the blockchain and gaming industries, such as game developers and **NFT** marketplaces. These partnerships will provide valuable opportunities for cross-promotion and will increase the visibility of our products.

1/2

5. MARKETING & SALES STRATEGY

Additionally, **Bixos** will utilize a strong customer support and onboarding process to ensure that customers have a positive experience with our products and are able to get the most out of them. This will help to build long-term relationships with customers and encourage them to recommend our products to others.

In terms of sales, **Bixos** will primarily focus on direct sales to customers through its website and through partnerships with key players in the industry. The company will also consider utilizing a sales team to further expand its reach and to better understand the needs of customers. Overall, the goal of the marketing and sales strategy is to establish **Bixos** as a trusted and reliable provider of blockchain solutions and to drive the adoption and use of its products.

2/2

6. COMPETITION ANALYSIS

Competition Analysis is a key aspect of the overall business strategy of any company. In this section, the aim is to evaluate and compare the company's strengths and weaknesses against the competition in the market.

6. COMPETITION ANALYSIS

9. ROADMAP

2023

- ▶ BXS Governance Smart Contract Finalization
- ▶ BXS Governance Smart Contract Documentation
- ▶ Smart Contract Audit completion
- ▶ Crypto payment gateway (CPG) development

- ▶ BXS Token investment program partnership.
- ▶ Crypto payment gateway (CPG) launch
- ▶ NFT Real Estate marketplace BETA version
- ▶ Running marketing campaigns
- ▶ CPG : Twitter integration (PayByUsername)

- ▶ Crypto payment gateway (CPG) BETA version
- ▶ CPG API doc launch.
- ▶ BXS Governance portal (GUI)
- ▶ NFT Real Estate Smart Contract Finalization
- ▶ NFT Real Estate legal framework finalization.
- ▶ Development of NFT Real Estate marketplace

- ▶ Crypto payment gateway R&D
- ▶ Credit Card payment integration to (CPG)
- ▶ Bixos marketplace development

9. ROADMAP

2024
